Office

Machines . . .

should be purchased with the greatest care

since they are the basis of a long standing partnership. Their suitability in operation is of paramount

importance if the benefits of mechanisation are to be fully enjoyed.

Whatever your particular office problem, whether in typewriting, calculating, book-keeping or other labour saving devices, such as dictating machines, record copiers or cash tills, etc., we are able to demonstrate one or more of the well-known makes and advise you, quite impartially, which is the most suitable machine for the work you have in mind.

Choice is the great advantage which we have to offer over most well-known manufacturers or vendors of office machinery. They are often limited to one particular design, not necessarily one most suited to your particular problem. We can, with complete impartiality, tell you which machine is the best one for your work. In doing this we can often save you a considerable amount of money by pointing out that a more simplified model would do the work just as well as its more complicated and expensive brothers. These are only some of the many advantages of coming to LOW'S

*We pride ourselves in being specialists in office machinery,
with a highly skilled staff to assist you in your choice.*
